

\$50M+

Enterprise AI revenue influenced through discovery, demos, value engineering, and technical win strategy

100+

Production voice AI deployments across Genesys, NICE, Five9, AWS Connect, SIP/WebRTC, and API ecosystems

38%

PoC win rate under evaluation frameworks with defined success criteria and measurable value cases

3 → 50

Global solution architecture practice built from a 3-person team across NA, EMEA, APAC, and LATAM

SUMMARY

Voice AI solutions architect and presales leader with 15+ years across enterprise conversational AI, contact center operations, and agentic systems. Open to FTE and contract. Led discovery, solution design, value engineering, executive demos, PoC governance, and technical win strategy for SoundHound/Amelia conversational AI through its 2025 analyst cycle (Gartner MQ Visionary, Everest PEAK Leader, IDC MarketScape Leader); influenced \$50M+ in enterprise AI revenue and led 100+ production deployments into the platforms enterprise voice AI sells into. Still hands-on: trains and tunes classifiers and builds voice pipelines. North American footprint across healthcare, financial services, utilities, retail, and regulated service environments.

CORE COMPETENCIES

SE / SA MOTION

Discovery Workshops

Executive Demos

PoC Governance

Value Engineering

RFP / RFI

Deal Engineering

ROI Modeling

Vendor Selection

VOICE & TELEPHONY

SIP / WebRTC

MRCP

LiveKit

Deepgram / Whisper

ElevenLabs

Voice UX / Barge-in

DTMF / Recovery

Escalation Design

AGENTIC AI

LangGraph

MCP

RAG

NLU / Intent

Human-in-Loop

Evaluation Design

Judge LLM

Guardrails

ROLE FIT

TECHNOLOGY

Architects telephony-grade voice AI: SIP/WebRTC, STT/TTS, voice UX (turn-taking, barge-in, fallback), CCaaS selection, and agentic orchestration.

VALUE

Builds executive business cases on contact center economics — containment, AHT, occupancy, attrition planning, CSAT/NPS.

GOVERNANCE

Designs accountability into agent architectures: audit evidence, authority boundaries, human-in-the-loop, and PoC win discipline.

REGULATORY

Fluent across HIPAA/HITECH, SOC 2, NIST AI RMF, ISO/IEC 42001, GDPR, and EU AI Act for regulated enterprise buyers.

EXPERIENCE

IntelePeer Jul 2026 Remote

Senior AI Solutions Engineer

- Designed a partner chat integration for a carrier-first, voice-only platform so a live deal could offer digital alongside voice — the gap Salesforce would otherwise have used to take the account. Wrote it up as a reusable sidecar; CRO framed it as a new SKU.

Ravenhelm, LLC Feb 2026 - Jun 2026 Austin, TX

Principal Consultant - Agentic AI Architecture & Accountability

- Advised enterprise and regulated-market clients on agentic AI architecture, voice AI systems, and accountability patterns for production use cases where auditability, authority boundaries, and operational risk matter.
- Built reference architecture for policy-aware AI agent accountability: ledger-backed audit chains producing evidence-backed answers about agent authority, delegation, scope, execution, and downstream effect.
- Operated a production-grade prototype stack: LangGraph multi-agent orchestration, MCP tool gateways with credential management and audit logging, LiveKit voice pipelines, local LLM inference, Langfuse observability, and governed human-in-the-loop workflows.

Quant Nov 2025 - Jan 2026 Remote

Vice President, Business Solutions - GTM & Agentic Business Lifecycle

- Led enterprise solution architecture and customer-facing technical alignment across Sales, Product, and Delivery for an agentic AI platform: discovery, business requirements, architecture, ROI narrative, and risk controls.
- Built the AI discovery and qualification toolkit — opportunity qualification framework, use-case discovery guide, solution discovery workbook, BRD templates, and strategic demo playbook — plus a value engineering framework with CFO-ready ROI formulas linking operational and CX improvements to financial outcomes.
- Designed the Agentic Business Lifecycle, aligning presales, demo engineering, workflow automation, human approvals, evidence capture, and KPI feedback loops into a governed customer execution model.

SoundHound AI / Amelia (formerly IPsoft Amelia) Apr 2019 - Oct 2025 Austin, TX / Remote

Senior Director, AI for Enterprise & Global Solution Architecture

ENTERPRISE VOICE AI & TECHNICAL SALES AT SCALE

- Led AI solution sales and solution architecture for enterprise conversational and voice AI across contact center, HR operations, healthcare, financial services, utilities, retail, and federal-adjacent accounts.
- Led **100+ production deployments** across Genesys, NICE, Five9, Talkdesk, AWS Connect, SIP/WebRTC telephony, EHRs, CRMs, ITSM systems, and backend APIs; evaluated competing CCaaS, ASR/TTS, and LLM stacks and designed integration architectures for enterprise voice at production call volumes.
- Influenced **\$50M+ in enterprise AI outcomes** — including \$17M Visionworks, \$9M Southern California Edison competitive displacement, and \$6.25M Chipotle — by architecting the technical win from discovery through PoC design, competitive positioning, executive narrative, and close.
- Won McKesson's HR Operations opportunity with a Salesforce-integrated conversational AI solution; downselected through a multi-round HCA RFP for enterprise IT Service Desk and HR conversational AI across a multi-site workforce.

VALUE ENGINEERING & WIN DISCIPLINE

- Developed the value engineering practice: discovery workshops, ROI workbooks, and executive business-case templates quantifying containment, AHT reduction, occupancy relief, and CSAT/NPS impact — grounded in contact center labor economics, where 30 seconds of AHT across millions of contacts is a headcount-scale saving.
- Created *Architecting Certainty* and PoC governance frameworks with success criteria, golden datasets, and demo standards, contributing to a **38% PoC win rate** and **114% lift** in overall sales win conversion.
- Built the healthcare AI practice from inception across payer, provider/IDN, and specialty accounts including UMiami Health, HCA, Sutter, Wellstar, Optum, McKesson, VSP, and Manitoba Blue Cross.

PRACTICE, APPLIED ML & ANALYST WORK

- Trained and optimized TensorFlow, PyTorch, and BERT-based intent classifiers — training-data curation, F1/precision/recall, confusion matrices, confidence thresholds, and production iteration, including A/B-tested DNN classifiers for McKesson intent recognition.
- Founded and scaled the global solution architecture practice from 3 to ~50 engineers across four regions and four business units after the SoundHound acquisition; led 2025 analyst placements end-to-end (Everest Group PEAK Leader, IDC MarketScape Leader, Gartner MQ Visionary).

OneSupport (formerly teleNetwork, Inc.)

Feb 2007 - Sep 2018 Austin, TX

Operations Manager - Technical Operations & Automation

- Ran 40+ person contact center and technical support operations for telecom and broadband clients — queue management, escalation paths, dispatch, WFM, and omnichannel routing — with sustained top-decile quality and CSAT. Operated for over a decade inside the environment enterprise voice AI now sells into.
- Engineered an internal workflow automation platform and productized it into a client-facing SaaS offering licensed by Frontier Communications at approximately \$2M ARR.
- Converted manual dispatch, escalation, reporting, CRM, and routing patterns into structured automation with operational controls and measurable service consistency.

SELECTED TECHNICAL DEPTH

VOICE & CX	SIP, WebRTC, MRCP, LiveKit, Twilio, Deepgram, Whisper, ElevenLabs, Genesys, NICE, Five9, Talkdesk, AWS Connect; voice UX (turn-taking, barge-in, DTMF fallback, disambiguation); escalation and containment.
AI / AGENTS	NLU/intent modeling, LangGraph, LangChain, MCP, RAG, tool calling, evaluation pipelines, Judge LLM patterns, human-in-the-loop approval, TensorFlow, PyTorch, BERT, local inference.
CLOUD & DATA	AWS, Azure, GCP, Docker, Kubernetes/k3s, Terraform, Postgres/pgvector, Redis, ClickHouse, Neo4j; OAuth2/SAML enterprise identity integrations.
GOVERNANCE	HIPAA/HITECH, SOC 2, NIST AI RMF, ISO/IEC 42001, GDPR, EU AI Act; PoC and evaluation governance; audit evidence patterns for AI agent behavior.

RESEARCH · SPEAKING · EDUCATION

RESEARCH	<i>Agentropy</i> (preprint, DOI 10.5281/zenodo.20818597) — conservation dynamics in resource-constrained multi-agent systems.
SPEAKING & ANALYST	Gartner, Forrester, NVIDIA GTC, HIMSS, Customer Contact Week; MBA guest lectures; Everest Group, IDC, Gartner MQ briefing support.
