Executive AI Solutions Architect | AI Governance, Agentic Systems & Regulated Automation

Executive AI solutions architect and technical sales leader with 15+ years turning complex, high-stakes operations into production AI, automation, and agentic systems. Lead solution design, account strategy, executive demos, POC governance, and delivery alignment for enterprise AI engagements across healthcare, financial services, utilities, retail, contact center, and regulated service environments. Influenced \$50M+ in enterprise AI revenue, led 100+ production deployments, and built a global solution-architecture practice from 3 to ~50 engineers across NA, EMEA, APAC, and LATAM. Hands-on builder of accountable-AI architecture — agent authority, audit evidence, and governance boundaries — not just the go-to-market motion.

Core Focus

- Enterprise AI/GenAI solution architecture, discovery, executive demo strategy, POC governance, proposal support, and technical win planning.
- Agentic systems: LangGraph multi-agent orchestration, MCP tool gateways with credential management and audit logging, RAG, human-in-the-loop approval, and evaluation pipelines.
- Production architecture across Genesys, NICE, Five9, AWS Connect, Salesforce, ServiceNow, Jira, EHR/CRM/ITSM systems, SIP/WebRTC, REST/OpenAPI, and backend APIs.
- Applied ML delivery: TensorFlow, PyTorch, and BERT classifier training; F1/precision/recall evaluation; confusion-matrix analysis; threshold tuning; production iteration.
- Cloud, data, and governance: AWS, Azure, GCP/GovCloud, Docker, Kubernetes/k3s, Terraform, Postgres/pgvector, Redis, ClickHouse, Neo4j; NIST AI RMF, ISO/IEC 42001, SOC 2, HIPAA/HITECH, GDPR, EU AI Act, audit-evidence patterns.

Professional Experience

IntelePeer | Senior AI Solutions Engineer

- Solutions engineering for enterprise AI and agentic communications; own product-demo tooling and infrastructure and build solution demos and technical assets that support the enterprise sales motion.

Ravenhelm | Principal Consultant — Agentic AI Architecture & Accountability Infrastructure

- Advise enterprise and regulated-market clients on agentic AI architecture, voice AI systems, governance, and accountability patterns for production use cases where auditability, authority boundaries, and operational risk matter.
- Built reference architecture for policy-aware AI agent accountability, including ledger-backed and Merkle-proof audit chains for evidence-backed answers about agent authority, delegation, scope, execution, and downstream effect.
- Operate prototype stack using local LLM inference, LangGraph multi-agent orchestration, MCP tool gateways with credential management and audit logging, LiveKit voice pipelines, Langfuse observability, and governed human-in-the-loop workflows.

Quant | Vice President, Business Solutions — GTM, Customer Strategy & Agentic Business Lifecycle

- Led enterprise solution architecture and customer-facing technical alignment across Sales, Product, and Delivery for an agentic AI platform serving complex enterprise accounts, including discovery, business requirements, architecture, ROI narrative, delivery plan, and risk controls.

- Built AI discovery and qualification assets: opportunity qualification framework, use-case discovery guide, solution discovery workbook, BRD templates, and strategic demo playbook for consistent client conversations and proposal support.
- Designed VEQTOR and the Agentic Business Lifecycle, aligning presales, demo engineering, sales operations, workflow automation, human approvals, evidence capture, and KPI feedback loops into a governed customer execution model.

SoundHound AI / Amelia (formerly IPsoft Amelia) | Senior Director, AI for Enterprise & Global Solution Architecture

- Led AI solution sales, solution design, account growth support, pipeline shaping, and delivery alignment for enterprise conversational AI, workflow automation, and agentic service experiences across HR operations, healthcare, financial services, utilities, retail, legal, and federal/DoD-adjacent accounts.
- Influenced \$50M+ in enterprise AI outcomes, including \$17M Visionworks, \$9M Southern California Edison competitive displacement, and \$6.25M Chipotle, through discovery-led solutioning, executive demos, POC strategy, proposal support, and close-stage buyer alignment.
- Led 100+ production deployments across Genesys, NICE, Five9, AWS Connect, EHRs, CRMs, ITSM systems, backend APIs, SIP/WebRTC, and custom enterprise environments; designed scalable, secure, highly available integration architectures.
- Built Amelia's healthcare AI practice from inception across payer, provider/IDN, DSO/specialty, RCM, ambulatory, vision, and home health accounts including UMiami Health, HCA, Sutter, Wellstar, Optum, McKesson, VSP, and Manitoba Blue Cross.
- Founded NASA, the Network of Amelia Solution Architects, scaling from 3 to ~50 engineers across four post-acquisition business units and four regions; designed hiring profiles, onboarding, enablement, certification, communities of practice, utilization standards, and delivery cadence.
- Created POC governance and evaluation frameworks with success criteria, golden datasets, demo standards, and measurable value cases, contributing to a 38% POC win rate and 114% lift in overall sales win conversion.
- Trained and optimized TensorFlow, PyTorch, and BERT-based intent classifiers using F1, precision/recall, confusion-matrix analysis, confidence-threshold tuning, and iterative production improvement.
- Authored Amelia's regulatory compliance reference guide and led 2025 analyst placements end-to-end: Everest Group PEAK Matrix Leader, IDC MarketScape Leader, and Gartner Magic Quadrant Visionary in Conversational AI.

OneSupport (formerly teleNetwork, Inc.) | Operations Manager — Technical Operations & Automation Builder

- Led 40+ person technical operations teams across telecom, broadband, customer support, and field service programs; maintained top-decile quality, efficiency, and customer-satisfaction outcomes.
- Engineered and productized an internal workflow automation platform into a client-facing SaaS offering licensed by Frontier Communications at approximately \$2M ARR.
- Converted manual dispatch, escalation, reporting, CRM, workforce management, and omnichannel routing patterns into structured automation workflows with operational controls and measurable service consistency.

Technical Depth, Thought Leadership & Credentials

- **AI/ML & GenAI:** LangGraph, LangChain, MCP, RAG, tool calling, human-in-the-loop approval, Judge LLM, evaluation pipelines, TensorFlow, PyTorch, BERT, local inference, prompt and workflow design.
- **Voice, CX & Human Operations:** Genesys, NICE, Five9, AWS Connect, LiveKit, Twilio, SIP, WebRTC, MRCP, Deepgram, Whisper, ElevenLabs, contact center operations, employee service delivery, ITSD.
- **Frameworks & speaking:** Architecting Certainty, Domain Intelligence Schema, Enterprise Multi-Platform Architecture Scaffold, APEX Automation Center of Excellence; Gartner, Forrester, NVIDIA GTC, HIMSS, CCW, MBA guest lectures.
- **Builder portfolio:** Runestack (AI accountability layer), Bifrost (MCP tool gateway), Agentropy / Agent Mass Theory, production voice AI systems — github.com/nwalker85.

- **Education & credentials:** A.A.S., Computer Networking — ITT Technical Institute, 2006; IBM Data Science Professional Certificate; CCNA (previous).
